Re: COVID-19 Mask Requirement

I'd like to compliment the library staff on the responsible opening of the library during this pandemic. I have used the online catalogue and picked up held books both in the library and through the curbside pick up. When I have gone inside the library I have appreciated not only that the staff were wearing masks but that they required other patrons to wear masks.

There should be no question that this policy should be continued both for the safety of the visitors and the staff. As a public institution the library can set an example of appropriate and responsible behavior during these unprecedented times.

Thank you.
