To: GFPL Board of Directors

I recently heard from a friend that there have been complaints regarding the library's requirement that all staff and library users must wear masks. This is one of the simplest and most effective ways to stop the spread of COVID-19. For the safety of the library staff and all library users, I think you should maintain this requirement.

If people truly care about the library and the services it offers, wearing masks while there is such a small inconvenience. As an older person myself, I would not risk using the library if staff and other patrons were not wearing masks.

Thank you for your service to the library and the community.

Sincerely,

Randi Graves
